Entendendo Nested Attributes

Criando uma Task para as questões

Entendendo Nested Attributes

- Nested Attributes (Atributos Aninhados)

<https://api.rubyonrails.org/classes/ActiveRecord/NestedAttributes/ClassMethods.html>

Entendendo Nested Attributes

- Altere **app/models/question.rb**

```
class Question < ApplicationRecord
  belongs_to :subject
  has_many :answers
  accepts_nested_attributes_for :answers, allow_destroy: true
end
```

Entendendo Nested Attributes

- Nested Attributes (Atributos Aninhados)

```
params = { question: {  
  description: 'lorem ipsum?', subject_id: 1,  
  answers_attributes: [  
    { description: 'resposta 1', correct: false },  
    { description: 'resposta 2', correct: true },  
    { description: 'resposta 3', correct: false }  ]  
}}
```

```
question = Question.create!(params[:question])  
question.answers
```
