

Ruby on Rails 5.x

Do início ao fim!

Adicionando datos extras

Adicionando dados extras

- Crie o model...

```
rails g model UserProfile address:string gender:string  
birthdate:date user:references
```

```
rails db:migrate
```

Adicionando dados extras

- Adicione ao model...

time_to_answer/app/models/user.rb

```
has_one :profile_user  
accepts_nested_attributes_for :profile_user, reject_if: :all_blank
```

Adicionando dados extras

- Altere o controller
**app/controllers/users_backoffice/profile_controller.
rb**

```
def edit
  @user.build_user_profile if @user.user_profile.blank?
end

bypass_sign_in(@user) # no update
```

Adicionando dados extras

- Altere o controller

**app/controllers/users_backoffice/profile_controller.
rb**

```
def params_user
  params.require(:user).permit(:first_name, :last_name, :email,
    :password, :password_confirmation, user_profile_attributes: [:id,
    :address, :gender, :birthdate])
end
```

Adicionando dados extras

- Altere a view...

app/views/users_backoffice/profile/edit.html.erb

```
<%= form.fields_for :user_profile do |profile_form| %>
  <div class="form-group">
    <%= profile_form.label :address, class:"control-label
col-md-3 col-sm-3 col-xs-12" %>
    <div class="col-md-6 col-sm-6 col-xs-12">
      <%= profile_form.text_field :address,
class:"form-control col-md-7 col-xs-12" %>
    </div>
  </div>
</div>
```

Adicionando dados extras

```
<div class="form-group">
  <%= profile_form.label :gender, class:"control-label col-md-3 col-sm-3
col-xs-12" %>

  <div class="col-md-6 col-sm-6 col-xs-12">
    <%= profile_form.text_field :gender, class:"form-control col-md-7
col-xs-12" %>

  </div>
</div>

<div class="form-group">
  <%= profile_form.label :birthdate, class:"control-label col-md-3
col-sm-3 col-xs-12" %>

  <div class="col-md-6 col-sm-6 col-xs-12">
    <%= profile_form.text_field :birthdate, class:"form-control col-md-7
col-xs-12" %>

  </div>
</div>
<% end %>
```
