Ruby on Rails 5.x

Do início ao fim!

 Labels
 https://getbootstrap.com/docs/3.3/components/ #labels

 Adicione a action em app/controllers/site/search_controller.rb

```
def subject
   @questions = Question._search_subject_(params[:page],
params[:subject_id])
end
```

Adicione ao model
 time_to_answer/app/models/question.rb

```
scope :_search_subject_, ->(page, subject_id) {
  includes(:answers, :subject)
  .where(subject_id: subject_id)
  .page(page)
}
```

 Para evitar o problema do N+1, adicione :subject aos includes dos scopes em

time_to_answer/app/models/question.rb

```
scope :...
includes(:answers, :subject)
...
```

Adicione a rota... time_to_answer/config/routes.rb

```
namespace :site do
  get 'welcome/index'
  get 'search', to: 'search#questions'
  get 'search_subject/:subject_id/:subject', to: 'search#subject', as:
search_subject'
  post 'answer', to: 'answer#question'
end
```

Crie o arquivo
 app/views/site/search/subject.html.erb com o conteúdo a seguir...

time to answer/app/views/site/search/subject.html.erb

Altere o arquivo

app/views/site/shared/_questions.html.erb

Crie um helper em app/helpers/site_helper.rb

```
def msg_jumbotron
  case params[:action]
  when 'index'
    "Últimas questões cadastradas..."
  when 'question'
    "Resultados para o termo \"#{params[:term]}\"..."
  when 'subject'
    "Mostrando questões para o assunto \"#{params[:subject]}\"..."
  end
end
```
