Ruby on Rails 5.x

Do início ao fim!

Problema N+1 do SQL/Active Record

Criando as migrations para as questões

- Use o *includes*, veja:
  https://apidock.com/rails/ActiveRecord/QueryMet hods/includes

Criando as migrations para as questões

- Altere **app/controllers/admins_backoffice/questions_controller.rb**

```
def index
  @questions = Question.includes(:subject)
                       .order(:description)
                       .page(params[:page])
end
```
